

TokenGochi

A pet that feeds on my Codex subscription

Hugo Alves

Token maxing, with emotional consequences

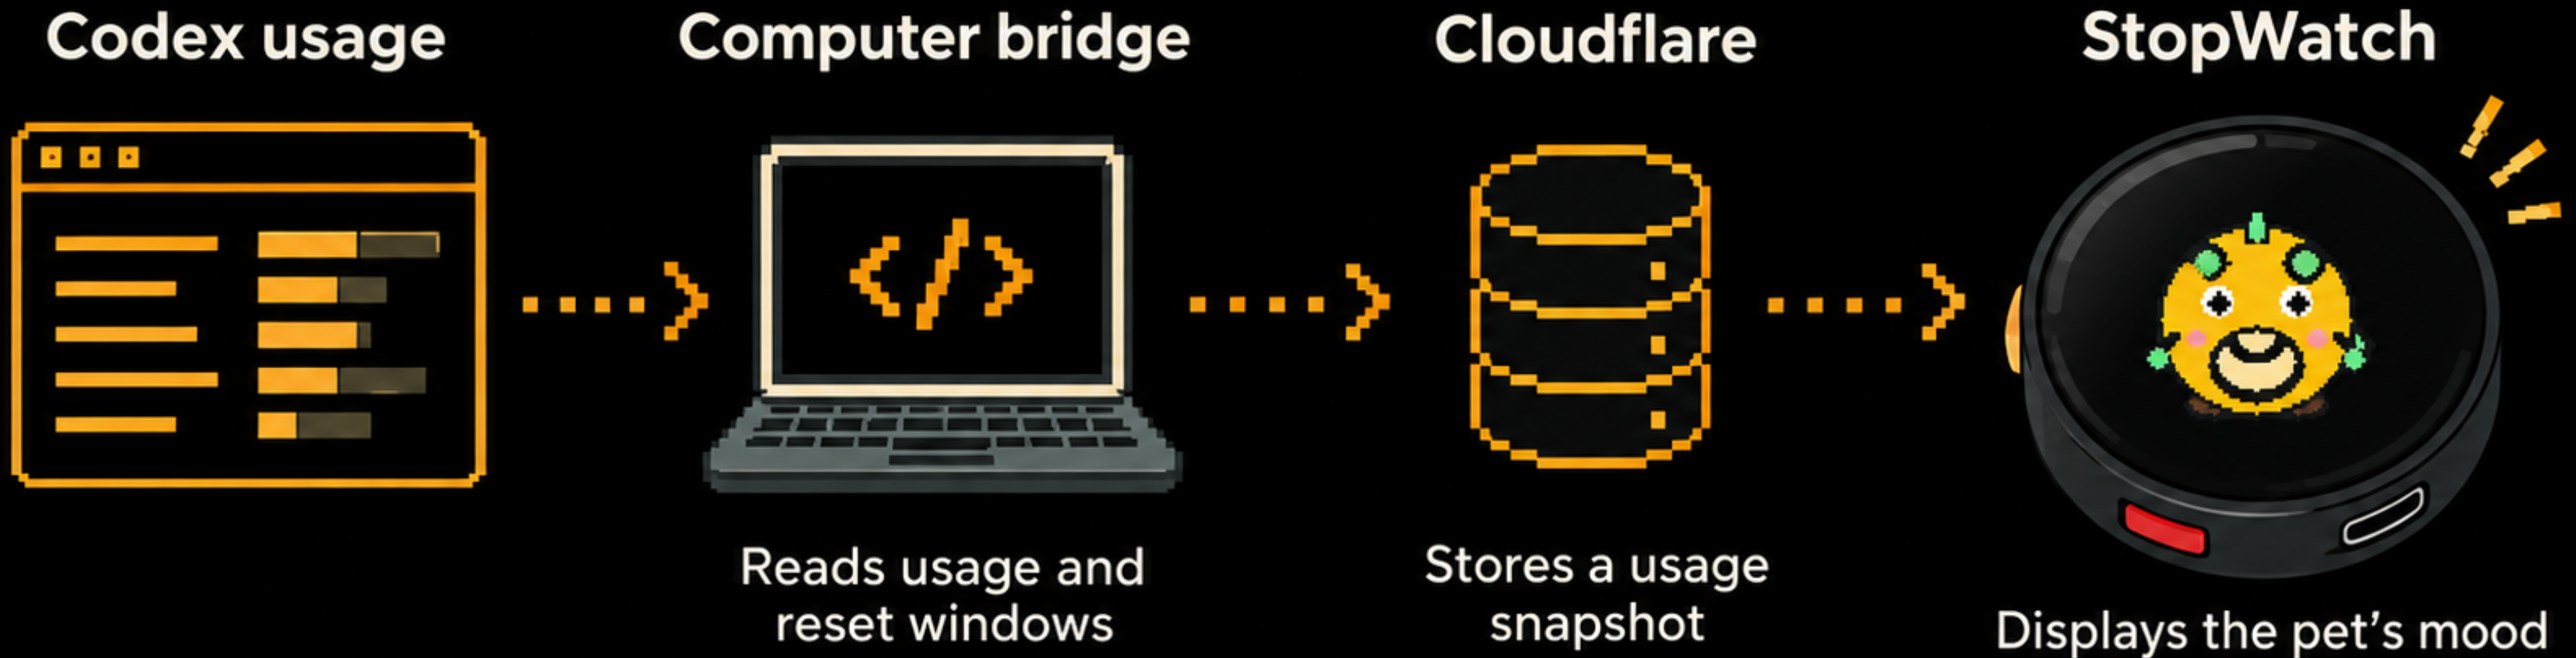

I was paying for tokens
I wasn't using.

So I gave them
a hungry face.

Reading my subscription

How does a tiny device know how much Codex I've used?

Experimental account access • Credentials stay on the computer

Turning usage into appetite

Behind pace
Very hungry

On pace
Happy

Ahead of pace
Very happy

■ ■ ■ Appetite follows subscription usage versus time elapsed ■ ■ ■

Meet TokenGochi

Live demo

I no longer need the encouragement

I built it to make me
use more AI.

Now I'm hitting every
subscription limit.

The little computer revolution

“if you know what a
‘coding agent’ is then go
buy this or something
very similar”

Steve Ruiz, 25 July 2026

Independent experiments, shared curiosity

I had already started TokenGochi when I saw this.

One little computer, more things to make

TokenGochi

A pet that feeds on my AI usage.

Steady

A physical game I'm developing.

The same StopWatch becomes the game object.

✦ Software feels different when you can hold it. ✦
